

UDX A01

14. (Amended) A printing method according to claim 1 wherein the silica is not chemically bonded to the rest of the coating.

A4
15. (Amended) A printing method according to claim 1 wherein the silica is chemically bonded to the rest of the coating.

16. (Amended) A printing method according to claim 1 wherein the coating further comprises an anchorage agent.

A5
21. (Amended) A printing method according to claim 18 wherein the substance is Poly(propylene oxide).

A6
23. (Amended) A printing method according to claim 1 wherein the substrate and the pigmented particles are both acidic.

24. (Amended) A printing method according to claim 1 wherein the substrate is coated with a polyamide coating between the coating containing silica and the substrate.

A7
26. (Amended) A printing method according to claim 1 wherein the material of the substrate is chosen from the group consisting of PET, PVC and polycarbonate.

A8
28. (Amended) A printing method according to claim 1 wherein the coating forms a substantially smooth surface.

29. (Amended) A printing method according to claim 1 wherein the substrate is a sheet of material.

30. (Amended) A printing method according to claim 1 wherein the substrate is a disk.

A9
31. (Amended) A printing method according to claim 1 wherein the surface of the coating is film.

A10
36. (Amended) A coated substrate according to claim 33 wherein the coating is UV cured.

UDX A01

A10
com 37. (Amended) A coated substrate according to claim 33 wherein the coating comprises at least 30% silica.

A11 42. (Amended) A coated substrate according to claim 33 wherein the silica has a size of between 5 and 50 nanometers.

46. (Amended) A coated substrate according to claim 33 wherein the silica is not chemically bound to the rest of the coating.

A12 47. (Amended) A coated substrate according to claim 33 wherein the silica is chemically bound to the rest of the coating.

48. (Amended) A coated substrate according to claim 33 wherein the coating further comprises an anchorage agent.

A13 53. (Amended) A coated substrate according to claim 50 wherein the substance is Poly(propylene oxide).

55. (Amended) A coated substrate according to claim 33 wherein the substrate is acidic.

A14 56. (Amended) A coated substrate according to claim 33 wherein the substrate is coated with a polyamide coating between the coating containing silica and the sheet.

57. (Amended) A coated substrate according to claim 33 wherein the material of the sheet is chosen from the group consisting of PVC, PET and polycarbonate.

A15 60. (Amended) A coated substrate according to claim 33 wherein the coating is smooth.

REMARKS

The present application is a US national application of PCT Application No. PCT/IL99/00510. The present amendments, based on the claims attached to the IPER, have been made to place the application in proper US form. The application contains claims 1-24, 26, 28-57 and 60. Claims 25, 27, 58 and 59 have been canceled.
